Github: https://github.com/Skstyle007 Mobile: +91-9801394456

Skills

- **Languages**: Java, Python, C++, C
- **Frameworks**: Pandas, NumPy, SQL
- **Tools/Platforms**: MS Excel (Intermediate – Pivot Tables, Formulas), Power BI
- **Soft Skills**: Problem-Solving, Team Player, Leadership, Adaptability

Project

BMW Sales analysis | *Power BI* | **GitHub** Sep '25 - Dec '25

• Developed a professionally branded BMW sales analysis dashboard using Power BI, incorporating custom themes, icons, and visuals for executive-ready reporting.
• Built a structured data model to analyze BMW sales performance across multiple dimensions such as time, product, and market segments.
• Implemented interactive filtering, including custom text search slicers, enabling dynamic exploration of sales data and improved user experience.

Heart Disease Prediction | *Python – ML I* | **GitHub** Sep '25 - Dec '25

- Performed end-to-end data cleaning and preprocessing on medical datasets, handling missing values, outliers, and data inconsistencies to ensure model readiness.
- Conducted exploratory data analysis (EDA) to identify key health indicators influencing heart disease risk through statistical and visual analysis.
- Engineered and selected relevant features to improve prediction accuracy and reduce model complexity.
- Developed and trained Machine Learning models to predict heart disease presence based on patient health parameters.
- Evaluated model performance using appropriate metrics and optimized results through comparative analysis.
- Implemented predictive analytics logic to generate reliable, real-time disease risk predictions.
- Integrated the trained model with a web interface (UI design AI-assisted) to deliver user-friendly prediction outcomes.

Training

Fundamentals of Data Structures and Algorithms Mar '25 – Apr '25

- Completed structured training covering core concepts including arrays, linked lists, stacks, queues, Trees and graphs.
- Developed problem-solving skills through implementation of algorithms such as searching, sorting, recursion, and dynamic programming.

Certificates

- Cloud computing - by NPTEL Nov '25
- Computational Theory: Language Principle & Finite Automata Theory- by Infosys Sep '25
- The Bits and Bytes of Computer Networking – by Google Sep '24
- Responsive web design -by freecodecamp Nov '23

Achievements

- **Solved 200+ Coding Problem across different platform**: Nov '25
  Solved 200+ Data Structures & Algorithms problems on LeetCode and GeeksforGeeks.

Education

- **Lovely Professional University** Punjab, India
  Bachelor of Technology - Computer Science and Engineering; ***CGPA: 7.1*** *Since Aug '23*
- **ROS Public School** Sitamarhi, Bihar
  Intermediate; ***Percentage: 72%*** *Apr '20 – Mar '22*
- **PPJ Saraswati Vihar School** Nainital, Uttarakhand
  Matriculation; ***Percentage: 84%*** *Apr '19 – Mar '20*
